

Shubham Rajkumar Raut.

Full Stack Software Engineer.

Pune, India | +91 7499265181 | raut.shubham4554@gmail.com | [LinkedIn](#) | [Portfolio](#)

Professional Summary

Full Stack Software Engineer specializing in scalable SaaS and AdTech platforms. Experienced in building white-labelled systems, optimizing performance, and developing high-impact UI systems. Proven ability to own end-to-end development and deliver production-ready solutions in distributed agile teams.

Core Skills

Frontend: HTML5, CSS3, React.js, Redux, Context API, Zustand.

Backend: Node.js, Express.js.

Database: MongoDB, Mongoose.

Caching & Performance: Redis, React Query (Tanstack Query).

Authentication: JWT, Bcrypt.

Languages: JavaScript, TypeScript, Java.

Tools: Git, Vercel, Render.

Professional Experience

Software Engineer | Knorex India | April 2024 - Present

- Led UI development for a cross-channel AdTech platform (Display, Meta, Google, LinkedIn).
- Built reusable React components, reducing UI inconsistencies across modules.
- Optimized frontend performance by reducing unnecessary re-renders and improving rendering efficiency.
- Handled large-scale campaign dashboards with high-volume data across multiple advertising channels.
- Collaborated with UI/UX, QA, and backend teams in an agile environment.
- Worked in geographically distributed team with direct reporting to senior technical manager at Singapore.

Assessment Assistant | Masai School | November 2022 - April 2024

- Conducted live coding sessions and mentored 100+ students in data structures and problem-solving.
- Evaluated coding assessments, ensuring consistency and quality in evaluation standards.

Projects

Sniply – White-Labelled Salon Management SaaS Platform

[GitHub Repo](#) | [Deployed Link](#)

- Built a white-labelled SaaS platform with isolated data environments and custom theming.
- Owned end-to-end development, designed scalable architecture to support onboarding of multiple clients.
- Developed appointment, staff, and service modules improving workflow efficiency.
- Implemented Redis caching, improving API response time by ~30–40%.
- Built secure authentication using JWT and Bcrypt.

Education

- MSc Computer Science - College of Computer Sciences, Pune.
- Full Stack Web Development - Masai School, Bengaluru.

2022 - 2024

2022 - 2023

Additional Information

- Experience working in distributed teams (India, Vietnam, Singapore, Malaysia, USA).
- Strong understanding of scalable systems and performance optimization.
